

Emirates Building Systems provides 2000 MT of steel for Dubai Municipality's iconic Prosecution building

Project marks another addition to Company's strong portfolio of government led projects

Dubai, UAE, July 08, 2020: Emirates Building Systems (EBS), a wholly-owned subsidiary of Dubai Investments, and one of the leading manufacturers of steel structures in the Middle East, has won a contract to provide 2000 MT of steel for the Dubai Municipality's upcoming New Prosecution building and Car Parking in Umm Hurair, Dubai.

Designed in a modern and distinctive style to be an architectural icon overlooking the banks of Dubai Creek, the project, with a built-up area of 53,000 Sq.m comprises of ground plus 2 floors of parking, a mezzanine and 5 floors with a roof forming the main building structure and an extended car parking building with ground, two floors and a roof floor.

As per the agreement with the main contractor the scope of the project covers engineering, fabrication and erection of steel structures in addition to fire proofing. The main building scope for EBS covers deck slabs - 1st Podium, 2nd Podium, Mezzanine, 4th Floor, 5th Floor and the roof, including the roof for the theatre area, left side roof canopy and the right side roof canopy. The deck slabs - 1st Podium, 2nd Podium, and Mezzanine level including staircases, steel bridges and sandwich panel roofing, covers the scope of the parking building of the project.

"EBS's efficient production capabilities coupled with technical expertise play a major role in executing a fast-track project like the Prosecution building. Keeping up with the time-line, rigorous sourcing, production and availability of the materials was a top priority despite challenging business times and the co-ordination between the electro-mechanical, aluminum, glass and steel structure teams clearly reflected our engineering capabilities. With our strong portfolio of government projects like the Dubai Metro project and the Dubai World Centre Passenger Terminal and Cargo Terminal to name a few, the current project is another addition to the list, reinstating our position as an efficient and reliable partner in the execution of key projects", said Joseph Chidiac, General Manager of Emirates Building Systems.

The project is expected to be finished by December 2021 with the car parking facility on priority to be completed before the end of 2020.

"EBS is working closely with the main contractor to ensure timely completion of this fast-track prestigious project for Dubai Municipality", added Chidiac .

EBS continues to execute projects working closely with architects, client's teams, consultants and authorities, ensuring compliance to design and commercial requirements in addition to delivering safe, sustainable and cost-effective buildings.
