Passavant-Roediger wins Water and Wastewater treatment projects worth AED 166 Million in Europe

Company to increase focus on MENA and Asia for 2014 and expand its global project footprint

[UAE, February 10, 2014] - Passavant-Roediger GmbH, a wholly owned German subsidiary of Drake & Scull International (DSI) PJSC, has won three major projects for Water and Wastewater Treatment Plants in Romania, Bosnia and Herzegovina and Turkey for a combined value of AED 166 Million (EUR 33.4 Million). The project awards further cement the company's position as market leaders in the Water and Waste Water Treatment sector in Europe.

Under the terms of the Romanian agreement, Passavant-Roediger will undertake the execution of the civil, mechanical, electrical and SCADA (Supervisory Control and Data Acquisition) works, as well as testing and commissioning for the rehabilitation and extension of Wastewater Treatment Plants in the cities of Sinaia and Breaza and Drinking Water Treatment Plants in Comarnic and Sinaia; to be completed by 2015. The company is also currently delivering Wastewater Treatment Plants in the Romanian cities of Campina and Ploeni.

Passavant's scope of work in Bosnia and Herzegovina will involve the rehabilitation of the Sarajevo Wastewater Treatment Plant at Butila to increase its capacity to 170,000 cubic meter of wastewater per day to serve a population equivalent of 600,000. Passavant-Roediger will process the design, undertake detailed engineering work, and procure mechanical, electrical, and automation equipments. Work on the project is expected to be completed by 2016.

Passavant-Roediger continues to progress in Turkey, where it will work on Engineering, Procurement and Construction (EPC) works for a Wastewater Treatment Plant and Wastewater Collector Mains in Adiyaman, Turkey. As per the deal, the company will construct an activated

sludge plant with primary clarifiers, biological nitrification/denitrification and biological/chemical phosphorous removal and anaerobic stabilization of sludge in sludge digesters to treat 32,000 cubic meters of wastewater per day to serve a Population Equivalent of 185,000.

Dr. Mazen Bachir, Managing Director, Passavant-Roediger, said: “We are pleased to start 2014 on a positive note with three major project wins in Europe. We remain firm in our commitment towards providing cutting edge solutions that address the challenges facing the global water and wastewater industry. Our in house concepts and patented technologies, including anaerobic sludge digestion, enable our clients to reuse wastewater and divert it to agriculture as well as convert waste to energy that can power national power grids. Our strong presence and experience in Europe also gives us an advantage when it comes to offering the same quality of technology in emerging markets in MENA and Asia. We have delivered projects in KSA, Iraq, Algeria, Palestine, Jordan, Lebanon, China, and Vietnam in the past, and we hope to leverage and collaborate with DSI’s extensive network of resources and personnel across the world, to win more projects in newer markets.”

DSI acquired Passavant-Roediger in 2009 to enhance its capabilities in the region’s water and wastewater sector. Passavant-Roediger is a leading global developer of wastewater, water and sludge treatment technologies, with operations across Europe, Africa, Asia and the Middle East. The company delivers comprehensive in-house solutions for the design, supply, build, operations and maintenance, wastewater and water treatment facilities and is one of the leading Engineering, Procurement and Construction (EPC), Wastewater and Water Treatment (WWT) and Re-Use Design and Build Contractors Worldwide.

About Drake & Scull International PJSC

Drake & Scull International PJSC (DSI) is a regional market leader delivering world class quality projects via end to end solutions that provide integrated design, engineering and construction disciplines of General Contracting, Mechanical, Electrical and Plumbing (MEP), Water and Power, Rail and Oil and Gas, through People, Innovation, and Passion.

DSI established its first office in Abu Dhabi in 1966, and has since expanded operations to encompass offices in Dubai, Egypt, Kuwait, Libya, Oman, Saudi Arabia, Syria, Qatar, Jordan and India, Thailand, as well as managing projects in Europe and other parts of North Africa.

DSI 's main business streams include Drake & Scull Engineering, which serves as the MEP and Water & Power arm, Drake & Scull Construction (DSC), which is the General Civil Contracting unit and Drake and Scull Development, focusing on the Infrastructure sector.

In 2008, DSI offered 55% of its shares to the public and the IPO was oversubscribed 101 times. Ernst & Young ranked the IPO among the top 20 global IPOs in 2008.

DSI has since then used the funds to integrate, establish and acquire businesses that complement its corporate strategy of expansion into new markets, via organic and inorganic growth.

The fully Integrated Management Systems, certified to ISO 9001:2008, ISO 14001:2005 and OSHAS 18001:2007 standards are compliant with leading building, health and safety regulations, as well as sound environmental and energy management procedures.

DSI is a leader through experience, and has established a regional leadership position over 48 years of successfully completing the most complex projects on time, within budgets and matching set quality parameters.

DSI has completed many prestigious projects in the region for over four decades, and has helped shape the region's skyline from within.
