3.2 Basis of consolidation

The Company consolidated 100% of the operations, assets and liabilities of the subsidiary listed below (together the “Group”):

<u>Name of the entity</u>	<u>Country of incorporation</u>	<u>Principal activities</u>	<u>Legal and economic interest</u>
Damac Real Estate Development Limited, DIFC (“DRED”)*	United Arab Emirates	Holding company	100%

*the holding company includes 89 subsidiaries, the results of which are consolidated in DRED.

3.3 Financial risk management

The Group’s financial risk management objectives and policies are consistent with those disclosed in the consolidated financial statements for the year ended 31 December 2019.

4. Critical accounting judgments and key sources of estimation of uncertainty

In the application of the Group’s accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. In preparing these condensed consolidated interim financial statements, significant judgement is exercised by management in applying the Group's accounting policies.

The key sources of estimation uncertainty and the significant judgements are consistent with the annual audited consolidated financial statements of the Group for the year ended 31 December 2019, with the exception of the impact of the COVID - 19 outbreak on the Group which is detailed below.

**Notes to the condensed consolidated financial statements
for the six month period ended 30 June 2019 (continued)****4. Critical accounting judgments and key sources of estimation of uncertainty (continued)**

The Group continues to assess the impact of Covid-19 on its operations on a regular basis. However, the outbreak is evolving rapidly, due to which there is a material uncertainty around the expected duration and its potential impact on the overall economy and also on the operations of the Group. Due to this, it is challenging to assess the impact of such an evolving condition with certainty at this stage, considering the limited economic information available to determine the impact of the outbreak on the economy and on the real estate sector.

The Group has assessed that the current situation would impact key estimates used in determining the net realizable value of development properties, expected credit loss from trade receivables and contract assets and the fair valuation of financial investment. This is predominantly on account of the decline in demand and sale price of development properties. The Group has exercised significant judgements in evaluating the impact of the outbreak and shall consider reassessing such judgements and estimates in subsequent periods as the condition evolves. Actual results may differ from these estimates.

Financial investment

Financial investment in Damac International Limited is measured at fair value through other comprehensive income and not held for trading and debt securities. The Group has made an irrevocable election to classify the equity investments at fair value through other comprehensive income as this is considered to be more appropriate for these strategic investments.

At 30 June 2020, Group reviewed the carrying amount of financial investment in Damac Investment Limited, a related party whose principal activity is property development and as a result of this review, the Group recognised AED 43 million decline in fair value, on account of change in key estimates used to arrive at expected cash flows, which is a significant unobservable input for determining the fair value of such financial investment.

Financial investments held in quoted equity securities are measured at fair value through profit or loss. At 30 June 2020, Group assessed the fair value through quoted prices in active markets.

Impairment of trade and other receivables

An estimate of the collectible amount of trade and other receivables is made when collection of the full amount is no longer probable. For individually significant amounts, this estimation is performed on an individual basis. Amounts which are not individually significant, but which are past due, are assessed collectively and a provision applied based on expected credit losses on such receivables.

The Group expects that there will be an increase of the counterparty risk (risk of default) from customers and hence, continues to assess regularly the impact of COVID-19 on its operations, in particular the decline in sale prices and expected recoverable amounts outstanding from its customers. Based on these factors, the Group has reviewed the expected credit loss on trade and other receivables and charged loss allowances of AED 175 million to the statement of profit or loss and other comprehensive income for the six month period ended June 2020.

Net realisable value of development properties

The realisable values of development properties for the annual audited financial statements for the year ended 31 December 2019 were determined by the management based on valuations performed by qualified and independent chartered surveyors and property consultants. However, the realizable value of development properties in these condensed consolidated financial information have been determined by the management internally based on prevailing market situation.

**Notes to the condensed consolidated financial statements
for the six month period ended 30 June 2019 (continued)**

4. Critical accounting judgments and key sources of estimation of uncertainty (continued)

Net realisable value of development properties (continued)

The management has revised its estimates and judgements on expected decline in sale prices, demand and other estimates such as estimated cash flows due to the unprecedented set of circumstances. Based on these factors, the Group reviewed the carrying value of development properties and provided an additional provision of impairment of AED 438 million. Given the evolving condition of COVID-19, the management shall monitor the valuation of development properties on a regular basis and make the necessary judgements and estimates in the subsequent periods as may be required.

Classification of development properties

The Group classifies its development properties into "land held for future development", "properties under development" and "completed properties held in inventory". These categories are based on judgment whether the management intends to develop the property in the near future. During the period, the management has assessed that certain properties which were earlier categorised as "properties under development" will not be considered for development in the near future and hence the Group has reclassified these properties from "properties under development" to "land held for future development". This has resulted in an increased impairment provision during the three month period ended 30 June 2020.

5. Segment analysis

The Group currently comprises a single reportable operating segment, being property development. Information reported to the Board of Directors for the purpose of the resource allocation and assessment of performance is primarily determined by the geographical location of these operations.

Revenue, operating results, assets and liabilities presented in the consolidated financial statements of the Group pertains to property development segment of the Group.

Geographic information for the Group is split between operations in the U.A.E. "Domestic" and operations in other jurisdictions "International".

Cash held in escrow represents cash received from customers which is held with banks authorised by the Real Estate Regularity Authority (“RERA”). Use of this cash is restricted to the specific development properties to which the cash receipts relate and, hence is considered as cash and cash equivalents.

Balances with banks are assessed to have low credit risk of default since these assets are held with banks that are highly regulated by the central banks of the respective countries. Accordingly, the management estimates the loss allowance at the end of the reporting period at an amount equal to 12-month ECL.

Considering the historical default experience and the current credit ratings of the banks, the management have assessed that there is no impairment, and hence have not recorded any loss allowances on these balances.

Fixed deposits are financial assets held by banks with maturity period of less than and more than three months from the date of placement. As at reporting date, the fixed deposits earned interest at rates ranging from 1% to 6% (2019: 1% to 6%) per annum.

At the reporting date, fixed deposits and bank balances of AED 657 million (2019: AED 496 million) are held by banks under lien against credit facilities issued to the Group.

Impairment of development properties

At 30 June 2020, the Group reviewed the carrying value of its land held for future development, properties under development and completed properties by assessing the net realisable value of each project. This review resulted in an impairment provision of AED 438 million during the six month period ended 30 June 2020.
