REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

The Board of Directors
Emirates Islamic Bank PJSC
Dubai
United Arab Emirates

Introduction

We have reviewed the accompanying condensed consolidated statement of financial position of **Emirates Islamic Bank PJSC, Dubai, United Arab Emirates** (the "Bank") **and its Subsidiaries** (together referred to as the "Group") as at 30 June 2020 and the related condensed consolidated income statement, condensed consolidated statement of comprehensive income, condensed consolidated statement of changes in equity and condensed consolidated statement of cash flows for the six months period then ended. Management is responsible for the preparation and presentation of this interim financial information in accordance with International Accounting Standard 34 - *Interim Financial Reporting* ("IAS 34"). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with International Standard on Review Engagements 2410, "*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared, in all material respects in accordance with IAS 34.

8 SUKUK PAYABLE

a) During 2016, the Group issued sukuk amounting to AED 3.7 billion to raise US Dollar denominated medium term finance via a Sharia'a compliant sukuk financing arrangement. As at June 2020, the total outstanding sukuk payable is AED 3.7 billion.

Following are the details of all the sukuk financing arrangement in issue.

Issue Date	Amount (USD)	Listing	Profit rate (%)	Payment basis	Maturity
May 2016	750,000,000	Irish Stock Exchange & Nasdaq	3.542	Semi annual	May 2021
August 2016	250,000,000	Irish Stock Exchange & Nasdaq	3.542	Semi annual	May 2021

The Bank transferred certain identified Ijara and Murabaha assets totaling to AED 3.7 billion (the "co-owned assets") to its subsidiary, EIB Sukuk company limited – (the "Issuer"), a special purpose vehicle formed for the issuance of these sukuk. This medium term finance is carried at amortised cost.

In substance, the co-owned assets remain in control of the Group; accordingly, these assets continue to be recognised by the Group. In case of any default, the Group has provided an undertaking to make good all losses to the sukuk holders. The assets are in the control of the Group and shall continue to be serviced by the Group.

The Issuer will pay a semi-annual distribution amount from returns received in respect of the co-owned assets. Such proceeds are expected to be sufficient to cover the semi-annual distribution amount payable to the sukuk holders on the semi-annual distribution dates. Upon maturity of the sukuk, the Group has undertaken to repurchase the assets at the exercise price.

19 ASSETS AND LIABILITIES MEASURED AT FAIR VALUE

Fair Value of assets and liabilities

The table below analyses assets and liabilities measured at fair value on a recurring basis. The different levels in the fair value hierarchy have been defined as follows:

- Level 1: quoted prices (unadjusted) in principal markets for identified assets or liabilities.
- Level 2: valuation using inputs other than quoted prices included within Level 1 that are observable for the assets or liabilities, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: valuation using inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The fair value of financial instruments classified as level 3 are, in certain circumstances, measured using valuation techniques that incorporate assumptions that are not evidenced by the prices from observable current market transactions in the same instrument and are not based on observable market data. The Group employs valuation techniques, depending on the instrument type and available market data. For example, in the absence of active market, an investment's fair value is estimated on the basis of an analysis of the investee's financial position and results, risk profile and other factors. Favourable and unfavourable changes in the value of financial instruments are determined on the basis of changes in the value of the instruments as a result of varying the levels of the unobservable parameters, quantification of which is judgmental.

During the period ended 30 June 2020 no financial assets measured at FVOCI were transferred from Level 1 to Level 2 or from Level 2 to Level 1 (2019: AED Nil).

For comparative information please refer to the Group's consolidated financial statements for the year ended 31 December 2019.

Covid-19 and Expected Credit Loss (ECL)

The existence of novel coronavirus (Covid-19) was confirmed in early 2020 and has spread globally, causing disruptions to businesses and economic activity. In response, governments and central banks have launched economic support and relief measures (including payment deferrals) to minimize the impact on individuals and corporates.

20 RISK MANAGEMENT (CONTINUED)

Covid-19 and Expected Credit Loss (ECL) (continued)

In determination of Q2 2020 ECL, the Group has considered potential impact caused by Covid-19 pandemic (based upon available information) and taken into account economic support and relief measures of governments and central banks. The Group has also considered the notices issued by the Central Bank of UAE with regards to the 'Targeted Economic Support Scheme (TESS)' and 'Treatment of IFRS9 Expected Credit Loss in the context of Covid-19 crisis' as well as the guidance issued by the International Accounting Standards Board (IASB).

The Group has a dedicated IFRS 9 governance process established to review and approve IFRS 9 Stage migrations, management overlays to ECL estimates, and macro-economic scenarios and weightings.

Significant Increase in Credit Risk (SICR)

Under IFRS 9, loans are required to be moved from Stage 1 to Stage 2 if and only if they have been the subject of SICR since origination. SICR occurs when there has been a significant increase in risk of default.

The Group continues to assess borrowers for other indicators of unlikeliness to pay, taking into consideration the underlying cause of any financial difficulty and whether it is likely to be temporary as a result of Covid-19 or long term.

During 2020, the Group has initiated a program of payment relief to support its impacted customers by deferring interest/principal due for a period of one month to three / six months. These payment reliefs are considered as short-term liquidity to address borrower cash flow issues. The Group believes that the extension of payment reliefs does not automatically trigger SICR where the impact on customer's business is expected to be short term. For all other customers, the Group continues to consider severity and extent of potential Covid-19 impact on economic sector and future outlook, cash flow and financial strength, agility and change in risk profile along with the past track record in determining SICR.

As per the disclosure requirements of the Central Bank of UAE in the context of Covid-19, for the UAE operations, the Group has divided its customers benefitting from payment deferrals into two groups (Group 1 and Group 2). Customers not expected to face substantial changes in their creditworthiness, beyond liquidity issues caused by the Covid-19 crisis, have been retained in the same Stage as Q1 2020 and categorized in Group 1.

Customers expected to be significantly impacted by Covid-19 in the long term and that are expected to face substantial deterioration in their creditworthiness have been migrated to Stage 2 and categorized in Group 2. In exceptional circumstances, Stage 3 migration may have also been triggered where a customer's business, income streams and interest servicing capacity were expected to be permanently impaired. Such customers have also been categorized in Group 2 with the respective ECL overlay.

The accounting impact of the onetime extension of credit facilities due to Covid-19 has been assessed and has been treated as per the requirements of IFRS 9 for modification of terms of arrangement.

Forward Looking Information

In light of the current uncertain economic environment, the Group has assessed a range of possible macro-economic scenarios and associated weights, and analyzed their impact on Q2 2020 ECL estimates accordingly. The Group continues to assess individually significant exposures for any adverse movements due to Covid-19.

As with any economic forecasts, the projections and likelihoods of the occurrence are subject to inherent uncertainty and therefore the actual outcomes may be significantly different to those projected.

Analysis of customers benefitting from payments deferrals

The table below contains analysis of the deferred amount and outstanding balances of UAE customers benefitting from deferrals.

AED 000	Corporate and Institutional banking	Retail banking and Wealth Management	Total
Deferral amount	1,507,919	580,343	2,088,262
Exposures	5,400,741	8,125,252	13,525,993
Number of customers / accounts	97	35,336	35,433

Zero Cost Funding under the CBUAE TESS program availed by the Group amounts to AED 1,738 million which has been fully utilized to provide payment relief to the impacted customers.

As per the requirements of the Central Bank of UAE, the Group has divided its customers benefitting from payment deferrals into two groups as follows:

Group 1: includes those customers that are not expected to face substantial changes in their creditworthiness, beyond liquidity issues and are temporarily and mildly impacted by the Covid-19 crisis.

For these clients, the payment deferrals are believed to be effective and thus the economic value of the facilities is not expected to be materially affected. These customers will remain in their current IFRS 9 stage, at least for the duration of the crisis, or their distress, whichever is shorter.

Group 2: includes those customers that are expected to face substantial changes in their creditworthiness, in addition to liquidity issues that will be addressed by payment deferrals.

For these customers, there is sufficient deterioration in credit risk to trigger IFRS 9 stage migration. The Group continues to monitor the creditworthiness of these customer, particularly indications of potential inability to pay any of their obligations as and when they become due.

The impact of Covid-19 crisis continues to filter through into the real economy. In view of this, the Group has taken a proactive approach and on an ongoing basis for all customers, the Group continues to consider the severity and extent of potential Covid-19 impact on economic sectors and outlook, cash flow, financial strength, agility and change in risk profile along with the past track record and ongoing adaptation. Accordingly, all staging and grouping decisions are subject to regular review to ensure these reflect an accurate view of the Group's assessment of the customers' creditworthiness, staging and grouping as of the reporting date.

22 NEW STANDARDS AND AMENDMENTS APPLICABLE FROM 1 JANUARY 2020

IBOR Transition (Interest / Profit Rate Benchmark Reforms)

Effective from 1 January 2020, the Group has implemented amendments to IFRS 9 Financial Instruments, IAS 39 Financial Instruments: Recognition and Measurement and IFRS 7 Financial Instruments Disclosures relating to interest / profit rate benchmark reforms. The amendments (referred as Phase I of IBOR transactions project) addresses the hedge accounting requirements arising before Inter Bank Offer Rate ("IBOR") and proposed a hedging relief for such pre replacement hedges. The Group does not have exposure to cash flow hedges and fair value hedges, hence there is no impact of the above amendment.

The management is running a project on the Group's transition activities and continues to engage with various stakeholders to support an orderly transition and to mitigate the risks resulting from the transition. The project is significant in terms of scale and complexity and will impact products, internal systems and processes.
