21. Fair value of financial instruments

The Group's financial assets and financial liabilities comprise of cash and cash equivalents, investment deposits, financial assets measured at fair value through other comprehensive income (FVOCI), investments at amortized cost, subordinated loan, receivables and payables whose maturity is short term. Long term investment deposits carry market rates of return. Consequently, their fair value approximates the carrying value, after taking into account impairment stated in the condensed interim consolidated statement of financial position.

The Group has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

The fair value of financial instruments traded in active markets is based on quoted market prices at the condensed interim consolidated statement of financial position date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. These instruments are included in level 1. Instruments included in level 1 comprise primarily quoted equity investments and investment in sukuks classified as fair value through other comprehensive income.

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. These valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2. These investments comprise funds, the fair values of which are based on the net asset value provided by the fund managers.

22. Fair value of financial instruments (continued)

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. Level 3 assets represent unquoted equity and mutual fund investments whose fair value is determined based on varying unobservable assumptions which depend on a broad range of macroeconomic factors. The carrying values of these investments are adjusted as follows:

- Managed funds based on the net asset value derived from the EBITDA/PE multiple or value per share provided by the fund managers.
- Unquoted equity investments and other financial instruments using the latest available net book value and market approach based on prevailing secondary market prices of similar instruments.

There were no changes in valuation techniques during the period.

The following table presents the Group's assets and liabilities that are measured at fair value at 30 September 2023 and 31 December 2022.

The CT regime will become effective for accounting periods beginning on or after 1 September 2023.

The Cabinet of Ministers Decision No. 116 of 2022 specifies the threshold of income over which the 9% tax rate would apply and accordingly, the Law is now considered to be substantively enacted. A rate of 9% will apply to taxable income exceeding AED 375,000, a rate of 0% will apply to taxable income not exceeding AED 375,000 and a rate of 0% on qualifying income of free zone entities.

As the Group's accounting year ends on 31 December, accordingly the effective implementation date for the Group will start from 1 January 2024 to 31 December 2024, with the first return to be filed on or before 30 September 2025.
