The management of the Company is responsible for the preparation and fair presentation of this interim condensed financial information in accordance with International Accounting Standard 34, 'Interim Financial Reporting ("IAS 34")'. Our responsibility is to express a conclusion on this interim condensed financial information based on our review. The interim condensed financial information for the period from January 1, 2008 to September 30, 2008 was reviewed and the audit of financial statements for the year ended December 31, 2008 was performed by another auditor who issued an unqualified review report dated November 9, 2008 on the interim condensed financial information for the period ended September 30, 2008 and an unqualified audit opinion dated March 12, 2009 on the financial statements for the year ended December 31, 2008.

The Company holds the 7Up and Aquafina bottling and selling rights for the whole of the U.A.E.

The Company is listed on the Dubai Financial Market (DFM).

2. Significant accounting policies

Basis of preparation

The interim condensed financial information has been prepared in accordance with International Accounting Standard (IAS) No. 34: *Interim Financial Reporting*.

Costs that the Company incurs unevenly during the financial year are anticipated or deferred in the interim report only if it would also be appropriate to anticipate or defer such costs at the end of the financial year.

This condensed interim financial information should be read in conjunction with the financial statements for the year ended December 31, 2008.

The interim condensed financial information has been prepared on the historical cost basis, except for the revaluation of certain financial instruments which are stated at fair value.

This interim condensed financial information is presented in United Arab Emirates Dirhams (AED) since that is the currency of the country in which the Company is domiciled.

The same accounting policies, presentation and methods of computation have been followed in this condensed financial information as were applied in the preparation of the Company’s financial statements for the year ended December 31, 2008 except for the impact of the adoption of the standards and interpretations described below:

Notes to the Interim Condensed Financial Information - continued
For the period from January 1, 2009 to September 30, 2009

2. Significant accounting policies (continued)

Basis of preparation (continued)

IAS 1 (Revised 2007) *Presentation of Financial Statements* (effective for annual periods beginning on or after January 1, 2009)

The revised standard has introduced a number of terminology (including revised titles for the condensed financial information) and has resulted in a number of changes in presentation and disclosure. However, the revised standard has had no impact on the reported results or financial position of the Company.

IFRS 8 *Operating Segments* (effective for annual periods beginning on or after January 1, 2009)

IFRS 8 is a disclosure Standard that has resulted in a additional disclosure (see Note 7) but has had no impact on the reported results or financial position of the Company.

The Company also has adopted the revised and amended Standards and Interpretations issued by the International Accounting Standards Board (IASB) and the IFRIC that are relevant to its operations for the period beginning January 1, 2009. The adoption of these new and revised Standards and Interpretations did not have any effect on the financial position or performance of the Company.

Estimates

The preparation of interim condensed financial information requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing the interim condensed financial information, the significant judgments made by management in applying the accounting policies and the key sources of estimation uncertainty were the same as those that were applied to the financial statements as at and for the year ended December 31, 2008.

Financial risk management

The Company's financial risk management objectives and policies are consistent with those disclosed in the financial statements as at and for the year ended December 31, 2008.

Notes to the Interim Condensed Financial Information - continued
For the period from January 1, 2009 to September 30, 2009

2. Significant accounting policies (continued)

Dividend income

Dividend income is recognised when the dividend is declared and the right to receive it is established.

Business combination

The purchase method of accounting is used to account for acquisitions made by the Company. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets including intangible assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The excess of the cost of acquisition over the fair value of the identifiable net assets acquired is recorded as goodwill.

Intangible assets - Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the net identifiable assets acquired at the date of acquisition. Goodwill on acquisition is included in 'intangible assets'. Separately recognized goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

Non-current assets held for sale (assets of disposal group)

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

Notes to the Interim Condensed Financial Information - continued
For the period from January 1, 2009 to September 30, 2009

Furthermore, the Company has agreed to transfer employees to Jeema and the obligations for payment of remuneration and gratuity up to the completion date are the responsibility of the Company and Jeema will be responsible thereafter for such payments. However, if the new lease is not obtained by December 31, 2009, in terms of the agreement, all employees shall be transferred from Jeema back to the Company and all such costs relating to this transfer shall be borne equally by the Company and Jeema.

The Directors believe that the lease of land on which plant and equipment of Aquafina is constructed will be renewed as envisaged in the asset sale agreement (between the Company and Jeema) as they are in receipt of a letter from the authorities indicating their consent on the transfer of lease. 13. Note to the statement of cash flow

For the purposes of the interim condensed statement of cash flow, “cash and cash equivalents” comprise of:

Bank overdraft is included as a component of cash and cash equivalents for the purposes of the interim condensed statement of cash flow as it is repayable on demand, forms an integral part of Company's cash management and fluctuates from positive to negative during the period.

14. Earning per share

Earning per share is calculated by dividing the net profit attributable to shareholders by the weighted average number of ordinary shares in issue during the period (September 30, 2009: 60,000,000 shares; September 30, 2008: 60,000,000 shares). The bonus issue of shares is considered to be made at the beginning of the earliest period presented for the purpose of computation of weighted average number of ordinary shares. There are no dilutive instruments outstanding at the period end.

15. Seasonality of business impacting the results for the period (quarters)

Due to the seasonal nature of the business of the Company, the results of operations of certain quarters, which fall in off peak periods may be substantially different from other quarters, which fall in the peak season (i.e. during summer season). Therefore, revenues from operations may not be evenly distributed over the four quarters of the same year and thus the results of operations of the first two quarters may not be comparable to other quarters of the same year.
