Arabtec secures Dubai Municipality contract for House Sewage Connections and Miscellaneous Works

Arabtec Drainage Division has been awarded Dubai Municipality's prestigious ***Contract DS170 – House Sewage Connections and Miscellaneous Works****", worth* ***63.78*** *Million AED.*

The contract provides for the execution of house sewage connections, rehabilitation works, construction of sewer and drains, pumping/lift stations, pressure mains, non-disruptive road crossings, micro-tunneling and all related maintenance works necessary in the operation of Sewerage, Drainage and Irrigation Systems in the Emirate of Dubai.

The contract also deals with all kinds of emergency works to prevent or alleviate flooding or to provide a continuous service to the public as necessary at any time of day or night, for which an immediate and rapid deployment will be provided.

The duration of the contract is 31.5 months and spans over all of Dubai including Hatta.

This contract brings the total value of contracts being executed for Dubai Municipality to 190 million AED.

Arabtec Drainage Division had been awarded during the second quarter of 2005, a two years contract valued at 126 million AED to connect nearly 3000 residential plots in Mirdiff to the sewerage collection network and providing surface water drainage network, house connections, inspection chambers, road crossings and connections

Arabtec Drainage Division has already completed projects and handed over to customers in excess of 100 million AED over the last 3 years covering contracts with Dubai Investment Park and Dubai Municipality

Eng. Amin Shaheen, head of drainage division, stated that this contract demonstrates the quality and services Arabtec is offering to its customers in all sectors and reflects the company's strategy in diversifying projects portfolio.
